**Subject: DB2 Version 8 Upgrade**

The Commonwealth Office of Technology has received minimal response to the Jan. 16, 2008 Agency Contact Memo shown below. Therefore, COT will begin the process of converting to DB2 Version 8 on Feb. 18, 2008. The first steps of this process will be the installation of Ver. 8 in test environments and working with the vendor to identify possible issues that could be associated with the upgrade. After thorough testing of impacted systems is completed, an implementation date will be established and communicated to Agency and Technical Contacts. It is the goal of COT to have the production environment fully functional in Ver. 8 by end of 2nd Quarter 2008. To arrange for testing of applications or to field questions and concerns, please feel free to contact me at the phone or email address listed below.
